Riding for change:

VSC Solutions supports vulnerable children

VSC Solutions is dedicated to making a meaningful impact and has proudly supported SOS Children's Villages for years. This remarkable organisation provides loving homes to orphaned and abandoned children.

In each household, a dedicated SOS house mother provides not only love and care but also nutritious meals, homework assistance, life skills training, and encouragement for holistic development, creating a true family unit.

The goal is to support children who have lost parental care by providing a safe environment where they can develop a sense of belonging and access the resources needed to prepare them for independent living.

Recognising that every child is unique, the organisation empowers them to reach their full potential. To ensure holistic development, various educational, sports, arts, and cultural activities are made available, enriching their lives and helping them grow. Learn more at www.sossouthafrica.org.za

To bring attention to the children who rely on these homes, the VSC team participated in the Ride Joburg cycle race under the theme:

“Ride for a Purpose.”

This race is one of the largest mass-participation cycling events in the world and serves as a powerful platform to raise awareness about the incredible work done by SOS Children’s Villages.

The success of their participation has motivated VSC to turn this into an annual event. By increasing visibility and actively engaging in the race, they aim to raise funds and highlight the challenges faced by vulnerable children. Every pedal stroke contributes to changing lives, and their goal is to amplify the event’s impact year after year.

VSC also participated in the 1965 Ride for Education, which is an 850 km cycling tour from Johannesburg to Queenstown.

This event raises funds for scholarships and bursaries for deserving students. The cyclists are all amateur volunteers who strongly believe that the most important priority in our country is to improve education. Each cyclist raises their own sponsorships to support this initiative.
