Glenoaks Remedial and Special Needs School

Super Group IT Services (SGIT) is proud to collaborate with Glenoaks Remedial and Special Needs School on an important initiative that provides equal opportunities to neurodivergent learners. The term “Neurodivergent” refers to individuals whose neurological development and functioning differ from what is considered typical or neurotypical. This includes conditions such as autism, ADHD, dyslexia, and others.

Neurodiversity emphasises that these differences are natural variations of the human brain rather than deficits or disorders. Neurodivergent individuals may experience the world in unique ways, often leading to diverse strengths and challenges. Unfortunately, these individuals are often overlooked and disadvantaged, facing numerous hurdles when trying to enter the job market.

The Glenoaks programme is designed to support learners with special needs in developing valuable skills tailored to their strengths and interests. This not only boosts their employment prospects but also promotes an inclusive workplace free from discrimination. The SGIT team now includes Mikey Borowitz - a talented neurodivergent learner who is gaining valuable work experience in the IT department. Before he joined, the team participated in disability awareness and sensitivity training. This training fosters understanding, mindfulness and improves overall inclusion practices in the workplace.
